Connecting to Suffolk University's wireless WPA2 networks on Blackberry Curve 9330

This Quickstart Guide will help you to connect to WPA2, Suffolk University's secured wireless Network for faculty, staff and students. Students will need their Suffolk username and password to access **SU_Student_WPA2**. Faculty and staff must use their Suffolk desktop username and password to access **SU_Staff_WPA2.**

University Computer Policy

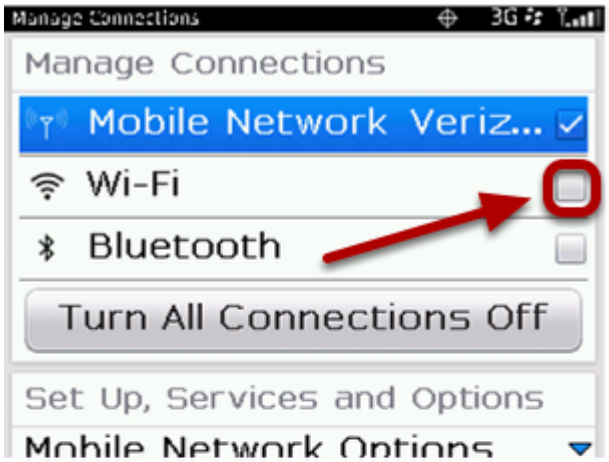

Suffolk University computing resources referenced by this document are bound by the University Acceptable Use Policy.

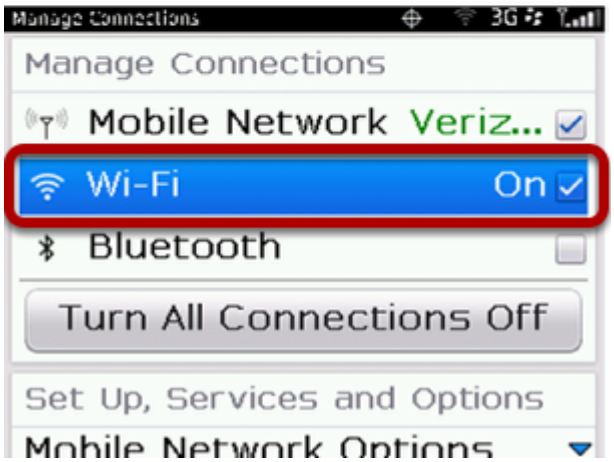

Step 1

Go to *Manage Connections* and click on the wireless icon.

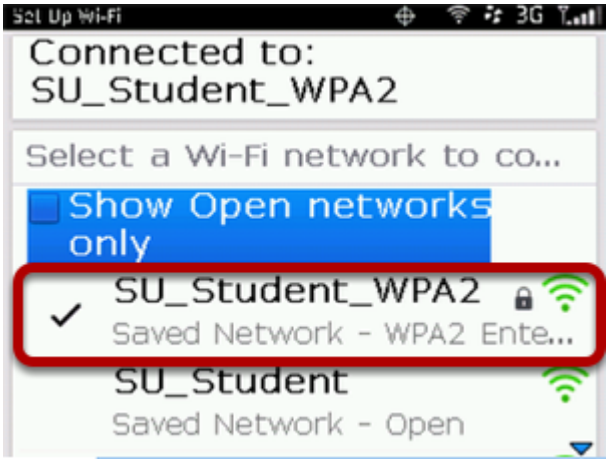

Step 2

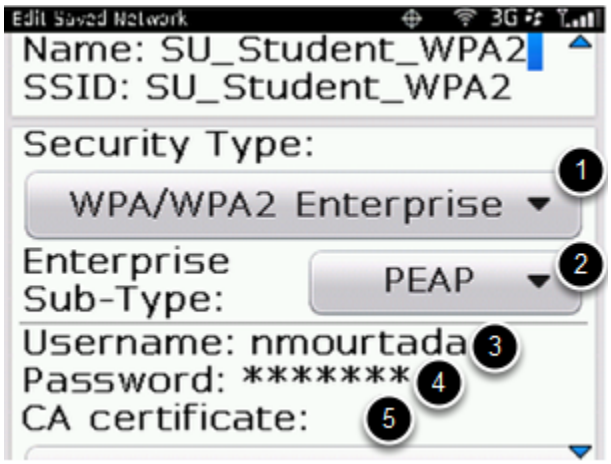

Check the *Wi-Fi* box if not checked. This will scan for available networks.

Step 3

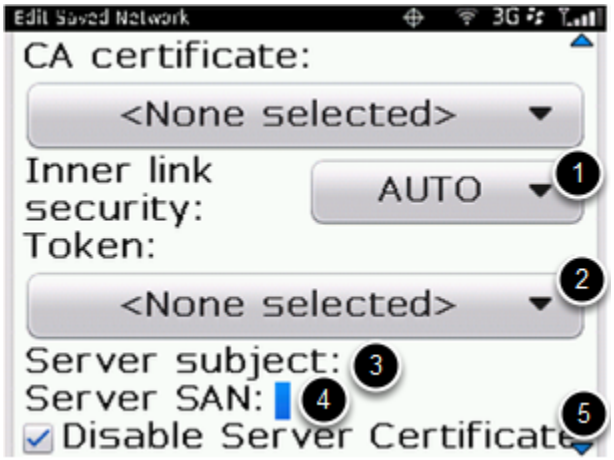

Once the scan is complete, select **SU_Student_WPA2** or **SU_Staff_WPA2** from the list of available networks.

Step 4

Enter the following information in the *Wi-Fi Security menu*:

1. Security Type: **WPA/WPA2 Enterprise**
2. Enterprise Sub-Type: **PEAP**
3. User name: ***<your Suffolk University username>***
4. User password: ***<your password>***
5. CA certificate: ***<leave blank>***

1. Inner link Security: **AUTO**
2. Token: ***<leave blank>***
3. Server subject: ***<leave blank>***
4. Server SAN: ***<leave blank>***
5. Disable Server Certificate: <**must be checked**>

Step 5

Click **Save and Connect**.

Finished!

You should now be connected to the **SU_Student_WPA2** or **SU_Staff_WPA2** wireless network.

If you are still unable to connect after following the above instructions, please contact the Help Desk at (617) 557-2000 or email helpdesk@suffolk.edu.

Troubleshooting Tips

- It may be necessary to turn your BlackBerry Wi-Fi off and back on in order to connect the first time.
