

Bloomberg

Bloomberg terminals are now available in the Sawyer Computing Center, 5th Flr, 8 Ashburton Place, the Mildred Sawyer Library 73 Tremont St, Sargent Hall Computer Lab and in the Sargent Hall Law Library, 6th Flr, 120 Tremont Street.

What is a Bloomberg Terminal?

When someone talks about Bloomberg, they are referring to a state-of-the-art financial, regulatory, and market database. Investors can access, crunch, analyze, and store information on their favorite companies. For professional mutual funds, hedge funds, private partnerships, insurance companies, banks, and other financial institutions, a Bloomberg terminal is considered an absolute requisite.

Suffolk University faculty, staff and current students now have access to this resource on and off campus.

Bloomberg provides up-to-the-minute news and prices from financial markets around the world. Offerings include 24-hour historical and 15-minute delayed securities pricing, news, data, and analysis on companies, markets and economies. Coverage includes equities, money markets, currencies, bonds, commodities, mortgage-backed securities, and derivatives.
