

Wireless Pointers

The Kensington PocketPresenter is a handheld device that allows the user to control slides from up to 50 feet away. Additionally, there is a built-in laser pointer in the front so that user can point out specific details on a slide.

The Kensington Wireless Presenter with Laser Pointer lets you control your presentation away from your computer. Conveniently portable and easy-to-use, it frees you from distraction and allows you to focus on what matters most - your presentation. The wireless technology lets you concentrate on your presentation and forget about wires, cords, and keyboards. Bright laser beam is easy to use and track.
