

# Installing Coursecast - Mac

This document will walk you through installation of the Panopto Coursecast Recorder on a Mac computer.

## 1. Download the Panopto Recorder software

Download the Recorder software from <http://coursecast.suffolk.edu/Panopto/Software/Panopto Recorder.pkg> and save it to your desktop for easy access.

## 2. Locate the software on your computer

Locate the file (Panopto Recorder.pkg) where you saved it on your desktop and click to begin the installation process.

## Run the installer and select the destination folder

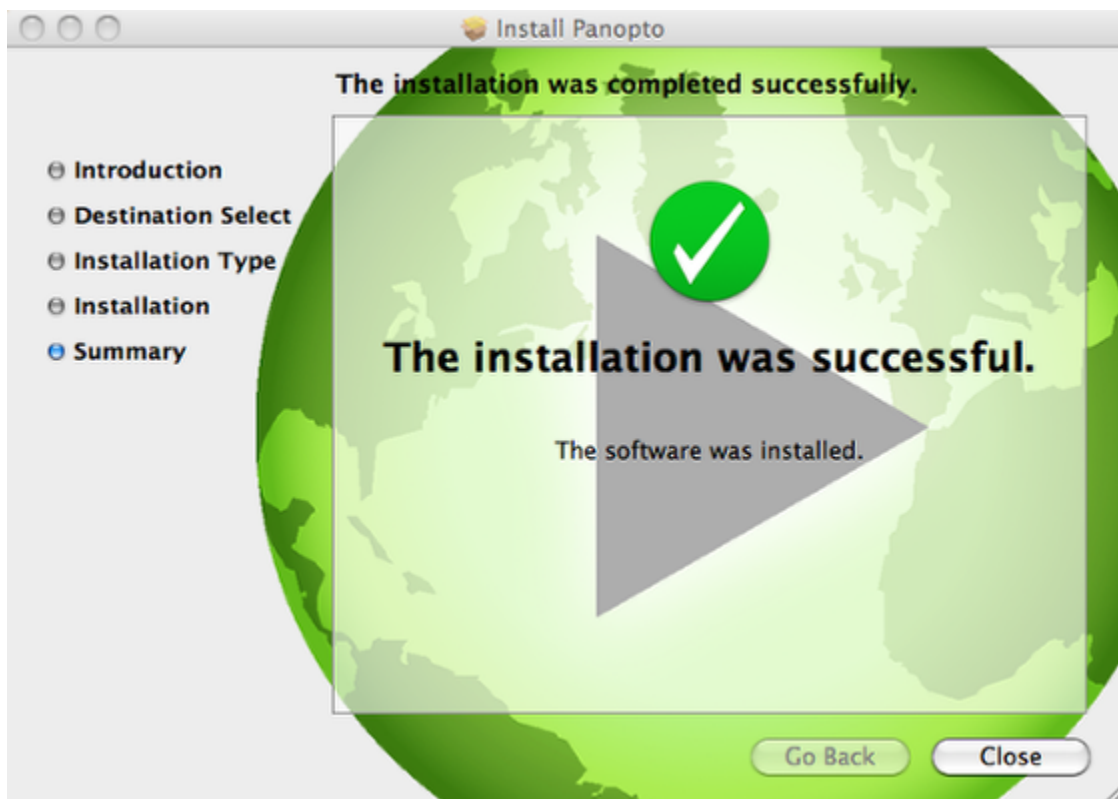

When prompted, accept the default settings and click Next on the "Install Panopto" window

Click Install to begin the installation

Accept the defaults for the Standard Installation and click the Install button when ready.

Complete the installation

Click Close

## 6. Restart your computer

The Panopto Recorder has been successfully installed on your computer. It is recommended you restart your computer at this time.
