## **Recording Offline with CourseCast - Mobile**

This lesson will walk you through how to record on your mobile iPhone or iPads device using Panopto CourseCast, but without Internet access.

NOTE: Panopto Coursecast is currently only supported on the iOS platforms. Support for Droid platform is planned for a future release.

1. To record offline using a mobile device, you must log in online at least once to enable offline recording

2. Once logged in to Panopto CourseCast, click on the Settings tab

Create New Recording	Recording Status	Settings
Configuration options for the Reco directory and background upload Settings" tab.	order are shown below. Win properties, and Panopto adm	dows administrati ninistrative privileo
Basic Settings Advanced Settings		
Application Settings	_	
Allow stored login info (Enable/disable "remember me")		
Advanced Capture Settings		
Use SmoothStream capture /	broadcast (BETA)	

NOTE: Make sure the "Remember Me" box is checked.

3. When you are finished with the Panopto recorder, close the application and do not log out

NOTE: If you log out, you won't be able to record offline

4. Open Panopto CourseCast on your mobile device

C	reate Recording Status
You are cou	currently logged into: rsecast.suffolk.edu
Choose a	a Folder and Session
Folder	Choose a Folder
Session	Create a New Session
	Record
	Upload
Г. Ноте	Recording Notes Settings

5. If you try to select a folder to record in to, nothing will appear because you are offline
