Copying a Test from One Course into Another

Copying a test from one course into another is a different procedure than just copying other content. Here we show you how it is done.

1. Get into the course containing the test you wish to copy and under the Control Panel, click on Course Tools and then Tests, Surveys, and Pools

2. Select Tests

NOTE: If your test uses a question set that is imported from a pool, you cannot use this method. Please look for the tutorial on copying a course, and when you get to the final step, select only the tests, surveys, and pools.

3. Find the test you want to copy and click on the contextual menu. Then click on Export:

<u>Name</u>	\bigtriangleup	Deployed
Final Course Evaulat	ion 😻	III. Wrap Up
Getting Started Quiz	Ø -	Getting Started
